Execute and Display the Results for cd, cp and ls Commands in Kali Linux

1. Aim

To execute and understand the cd, cp, and ls commands in the Kali Linux operating system.

2. Requirements

Kali Linux virtual machine or computer and Terminal.

3. Algorithm / Procedure

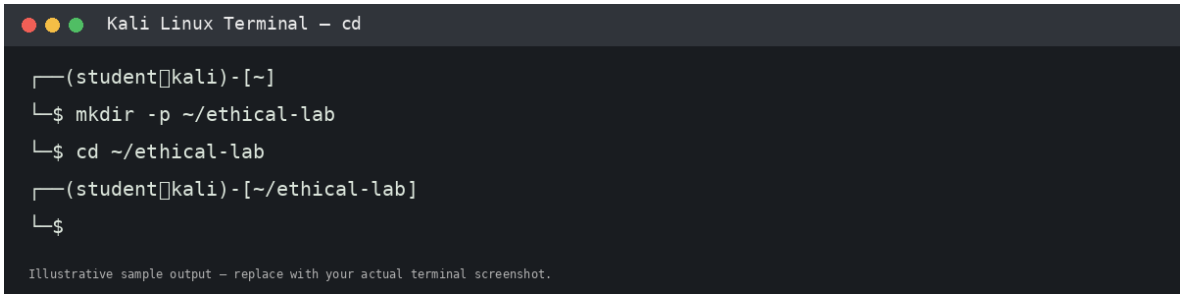

1. Start Kali Linux and open the Terminal.
2. Create a practice directory using: mkdir -p ~/ethical-lab
3. Change to the practice directory using: cd ~/ethical-lab
4. Create a sample text file using: echo 'Ethical hacking lab' > original.txt
5. Copy the file using: cp original.txt copy.txt
6. List the files using: ls
7. Check that both original.txt and copy.txt are displayed.

4. Commands and Explanation

A) cd — Change Directory

Command: cd ~/ethical-lab

Explanation: Changes the current working directory to the ethical-lab folder in the user's home directory.

B) cp — Copy Files

Command: cp original.txt copy.txt

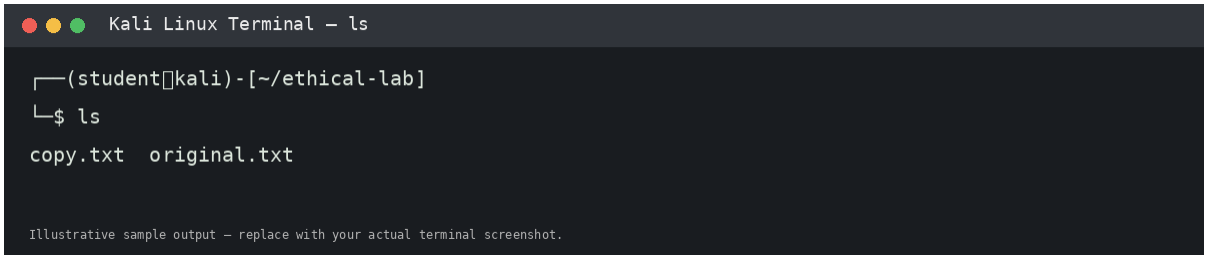

Explanation: Creates a copy of original.txt named copy.txt. Use this command only with files you own or are authorized to manage.

C) ls — List Directory Contents

Command: ls

Explanation: Displays the names of files and folders in the current directory.

5. Result

The cd, cp, and ls commands were explained and their expected terminal outputs were demonstrated. The cd command changes directories, cp copies a file, and ls lists directory contents.
